AssetGrade Market Summary – October 2025

- **Emerging Markets:** International markets continue to perform well as emerging markets stood out as the best performing asset class year to date through September 30th.
- **Declining Dollar:** A somewhat weaker U.S. dollar and easing trade tensions helped international equities
- **Valuation Risk:** with markets up and many sectors richly priced, future returns may moderate; portfolio discipline remains important
- **Fixed income matters:** While yields are lower, bonds still serve as a ballast in a portfolio and may benefit if rates fall further
- **Labor-market softness:** job growth has cooled and some payroll revisions suggest weakening. This raises questions about growth momentum ahead
- **Weathering Volatility:** staying focused on long-term goals and disciplined diversification remains the best way to weather short-term volatility

Asset class returns

Staying invested has paid off as equity, particularly international, outperformed cash
